

# Lesson 3.5j

## AOE-UN MPKI support to UN MDMP

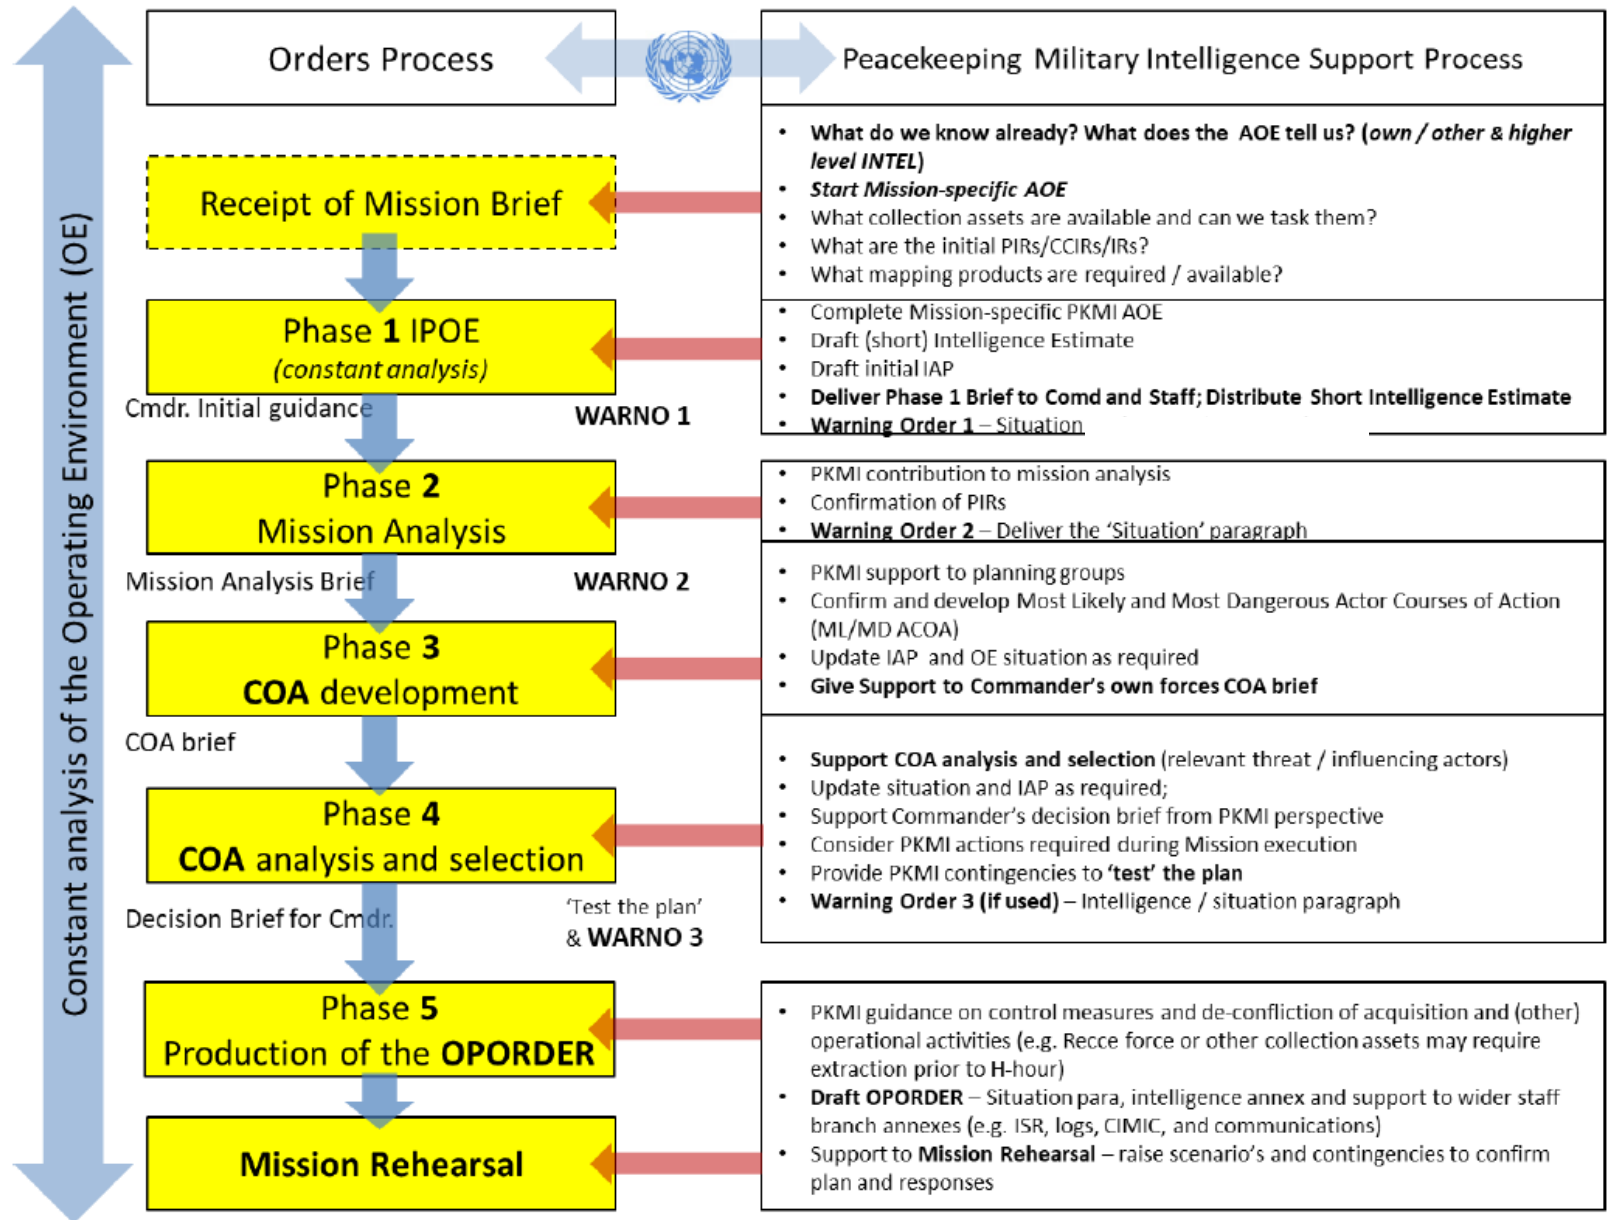

# Content

- MPKI support to UN Military Decision-Making Process (MDMP)
- Phase 1 brief
- Mission Analysis
- COA Development, Analysis and Selection
- Production of the OPORD

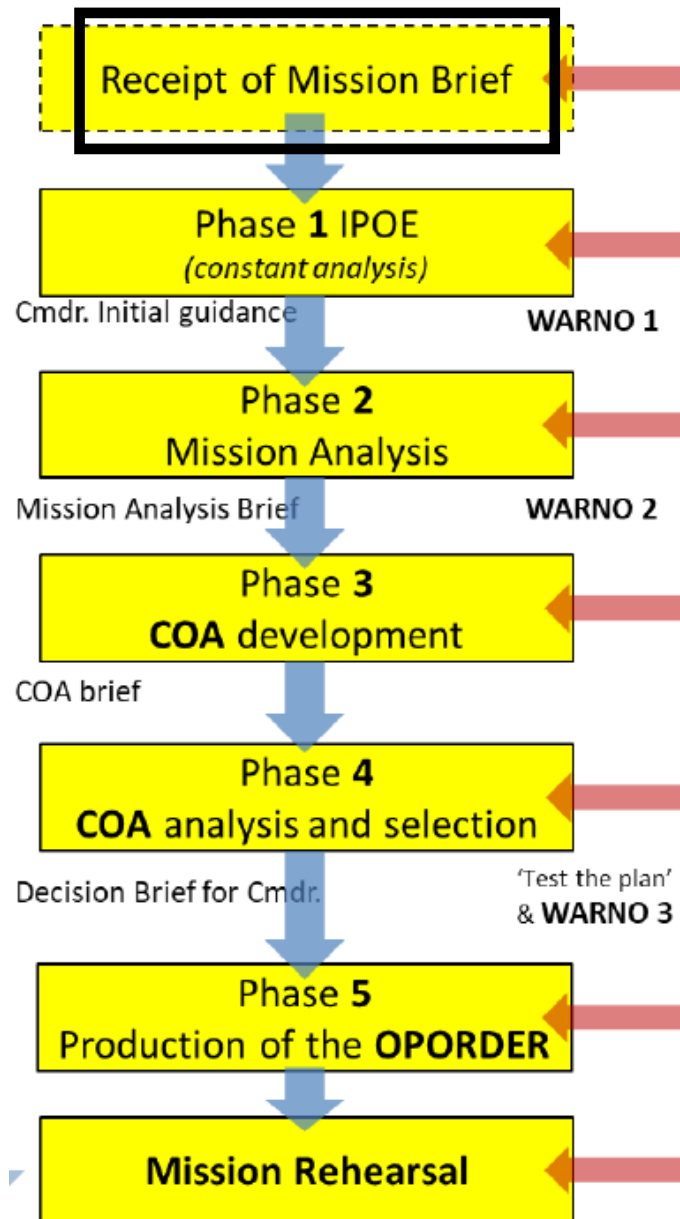

# Learning Outcomes

- Explain how MPKI products such as AOE supports the staff
- Explain why the Phase 1 brief is important
- Explain how MPKI supports the UN MDMP by phase

# MPKI support to UN MDMP

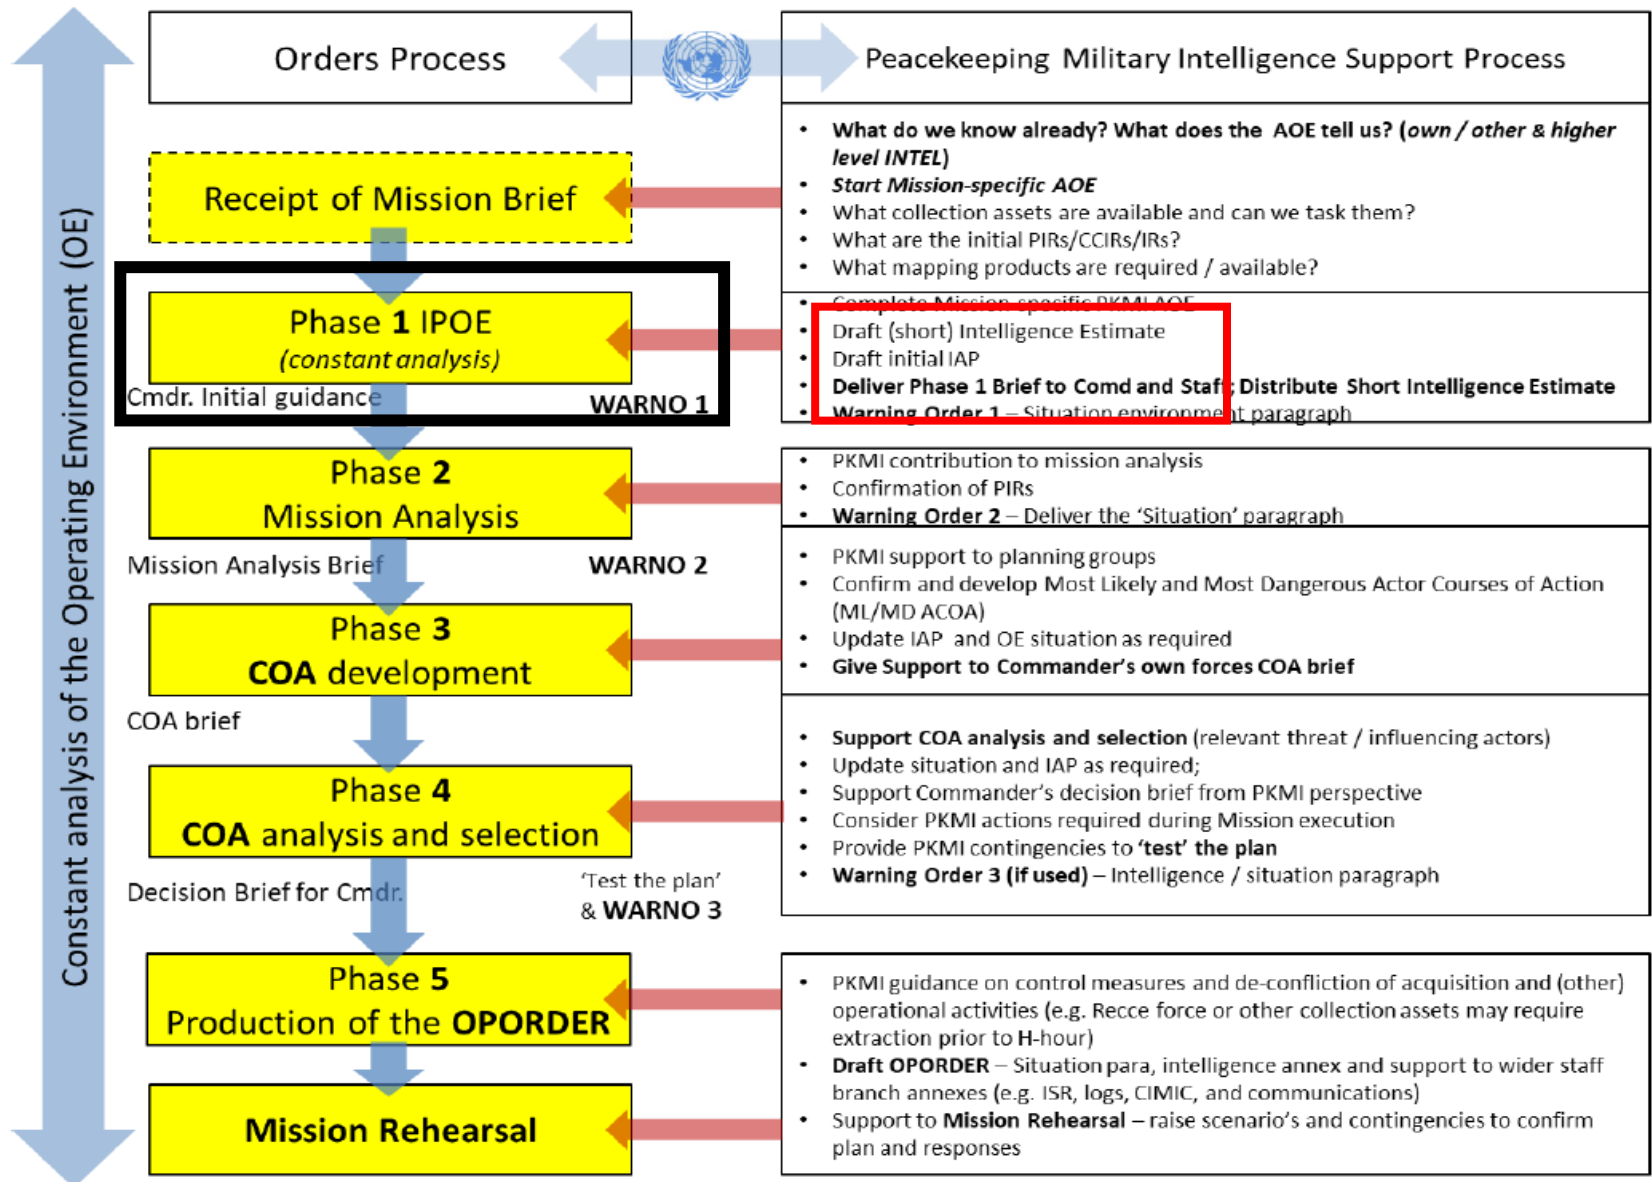

# Receipt of Mission Brief

- What do we already know?
- Collection assets and mapping products available
- Initial Commander guidance
  - PIRs/SIRs to initial IAP
  - Mission specific planning begins
- Start mission-specific AOE

# Phase One Brief – why is it relevant?

# Phase One Brief

- Informs / situates commander and staff prior to planning
- AOE foundation – ‘Golden Thread’ products:
  - Physical, human, information terrain analysis
  - Actor evaluation
  - Situation integration with assessed ML/MD COAs

# Phase One Brief – Template

Serial	Topic
01	Scope. Overview of what the Phase 1 Brief is going to cover and what briefing aids are going to be used.
02	Intelligence foundation. What intelligence the brief has been based on and inform the Commander of any intelligence gaps that are pertinent to the Mission. <b>Include Vital Intelligence</b>
03	Key assumptions and outputs. Inform the Commander of the key deductions and judgements you have identified from conducting AOE.
04	Ground in general. The Physical Terrain. Orientate the Commander and Planning Staff to the ground including weather effects. <b>Physical Terrain Analysis</b>
05	Ground in detail. The Mission Specific Physical Terrain in more detail. Depending on the type of mission to be conducted (Defensive / Offensive), inform the Commander of the specific ground detail that will affect his/her mission including any key infrastructure.
06	Human and Information Terrains. Factors that are pertinent to the mission are likely to include: <ul style="list-style-type: none"> <li>• Tribal and ethnic laydown</li> <li>• Displaced persons and refugees</li> <li>• NGOs</li> <li>• Key leaders</li> <li>• Pattern of life</li> <li>• HN armed forces</li> <li>• Infrastructure (Sewage, Water, Electricity, Academic, Refuge, Medical, Security, Other)</li> <li>• Information environment – social media trends (supportive/resistant to UN presence), media reporting, local communication capabilities</li> </ul> <b>Human and Information Terrain Analysis</b>
07	Threat Evaluation. Analysis of all threat actors that are pertinent to the mission, to include: <ul style="list-style-type: none"> <li>• Threat actor assumptions</li> <li>• Threat actor organisations and hierarchies including Key Leaders</li> <li>• Threat actor TTPs</li> <li>• Threat actor equipment and capabilities</li> <li>• Strengths and Weakness and Centre of Gravity Analysis</li> </ul> <b>Actor and Threat Actor Evaluation</b>
08	Situation Integration. How will the threat actors and human factors affect the mission when considered in relation to the physical environment? To include: <ul style="list-style-type: none"> <li>• Actors' Courses of Actions. Most Likely and Most Dangerous.</li> <li>• Updated Intelligence Acquisition Plan based on known intelligence gaps</li> </ul> <b>Situation Integration</b>

# Phase One Brief – Summary

- Mission specific
- Not telling the Commander all you know
- No more than 45 minutes
- Focus on situation integration and not the ground
- Know audience
- Keep it simple
- Remember the ‘Golden Thread’ products

# Example of a Phase One Brief

# Mission

- UNMMIG deploys in three conflict affected areas (sectors west, east, and north) of GARLAND, for the duration of its mandate to ensure: a safe and SECURE environment for all civilians in its area of operations; to FACILITATE the freedom of movement of humanitarian aid convoys; to MONITOR and report on violations of ceasefires, and of human rights violations; and, where possible, to ASSIST the government in the re-establishment of State authority.

**Sector East mission** is to establish a TOB south west of BINGA to DISRUPT IK freedom of movement, REASSURE local population and IDPs iot to establish SECURE environment and ASSIST Government of GARLAND.

# Scope – Part One

- Vital Intelligence
- Key Assumptions and outputs (if applicable)
- Analysis of the Operating Environment
  - Ground in General
  - Ground in Detail
- Information Terrain
  - GSM/Radio coverage
  - Local media – TV and Radio – are they supportive of UN?
  - Use of social media
  - Local communication systems/meetings.
- Human Terrain Analysis
  - Tribal/Ethnic Laydown – if important
  - Key actors: NGOs, Key Leaders, Refugees etc.
  - Pattern of life – If applicable
  - HN Armed Forces

# Scope – Part Two

- Actor Evaluation

Locations/organisations/capabilities/TTPs

COWARD

SWOT/COG

- **Situation Integration**

- **ML / MD COA**

- Event Overlay NAI/ TAI

- Recommended PIRs

Updates to IAP

Known intelligence gaps

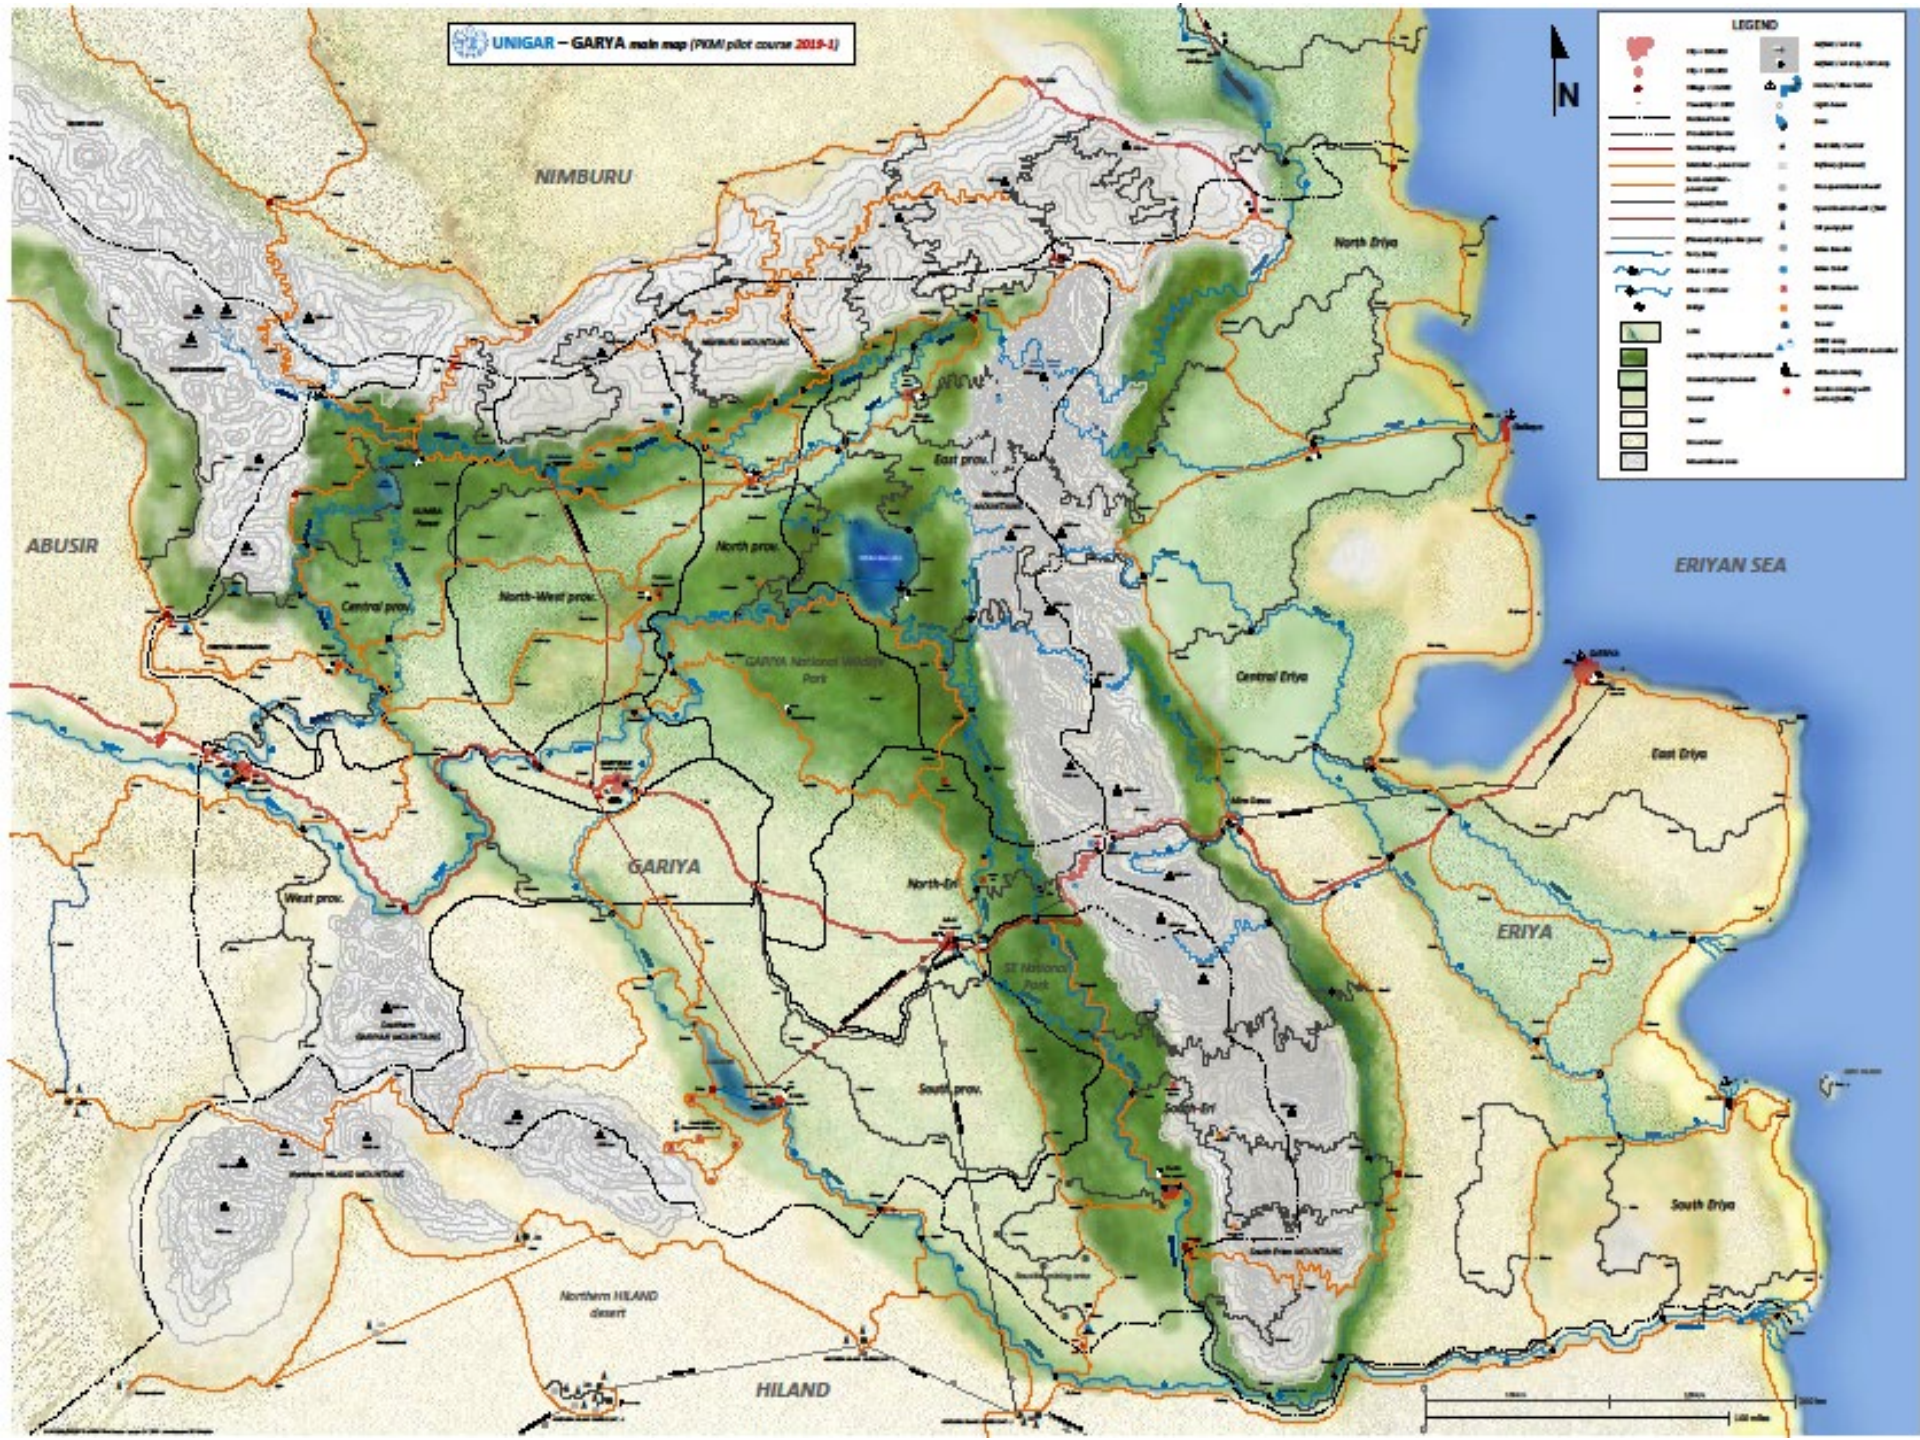

**Analysis - So what?**

# Vital intelligence

- SIGINT report 2245Z03MAY19\_003 suggests increased IK movement of arms and ammunition into caches within BINGA
- HUMINT report 0935Z01MAY19-002 states that IK have conducted public speeches in the IDP camp stating that UN forces are the enemy of GARLAND and should be forced to leave immediately
- HUMINT report 0718Z29APR19\_001, which has not been corroborated and is assessed as C3, states that coercion activity of local civilians to join the IK cause has increased
- **Key assumptions based on current intelligence:** It is assessed the any UN activity within the vicinity of BINGA will result in an armed / kinetic IK response

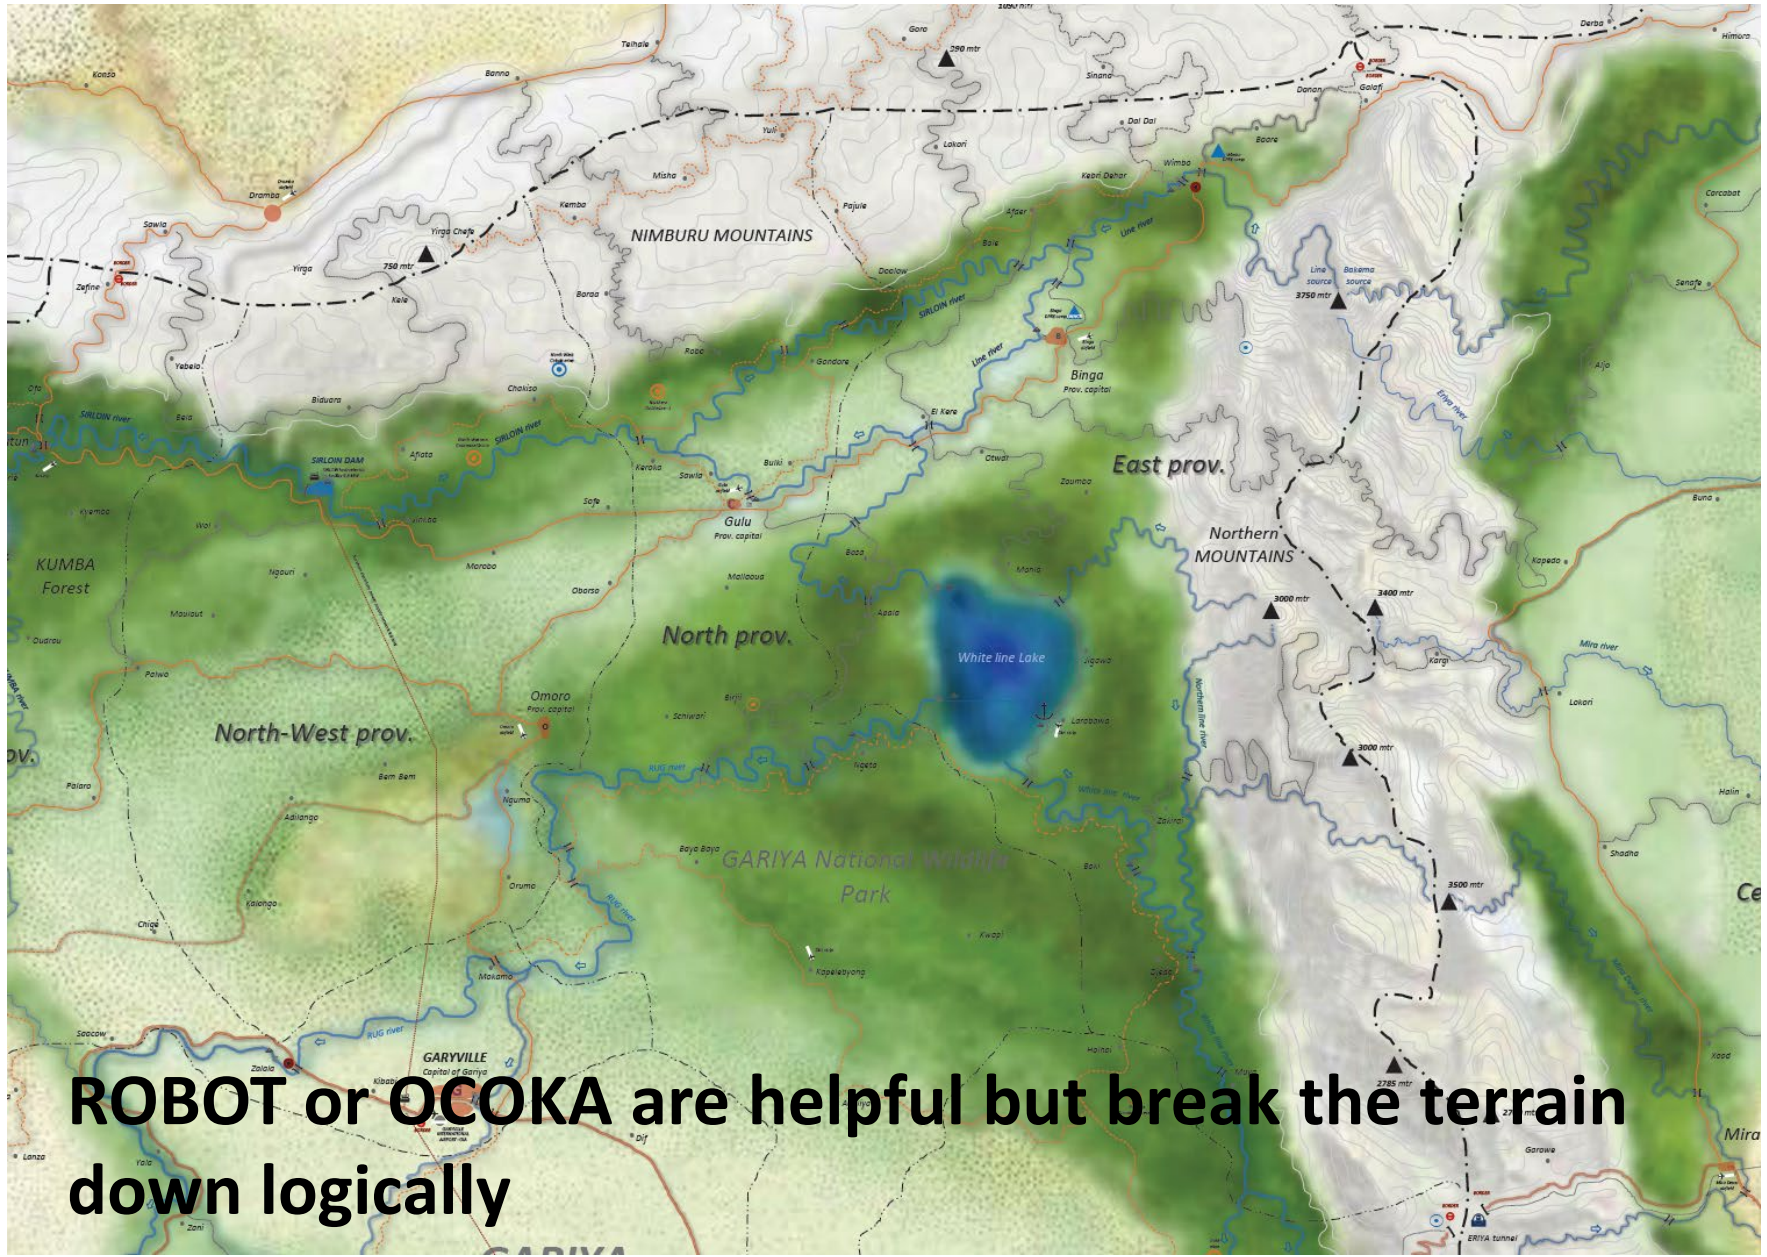

# Analysis of the Operating Environment (AOE)

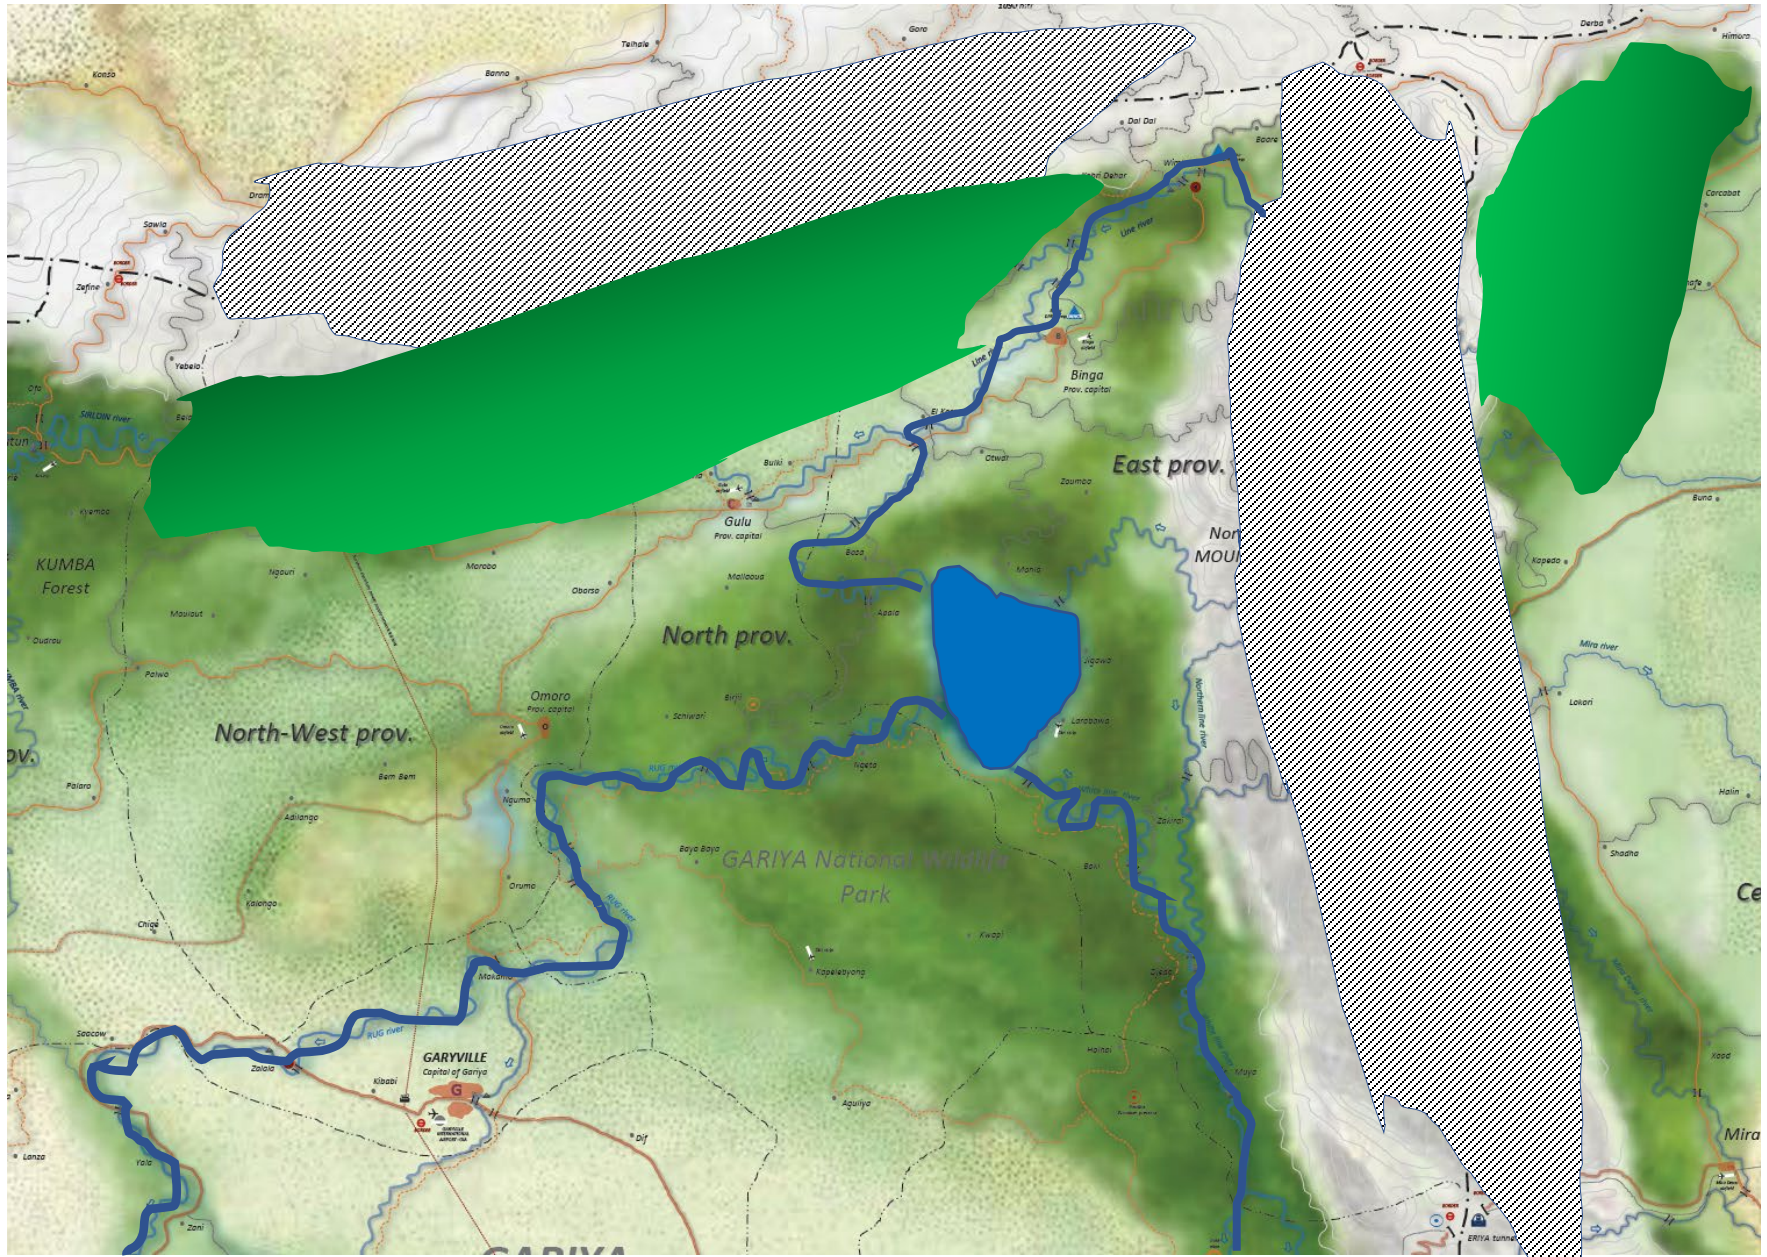

# Ground in general – Mission specific

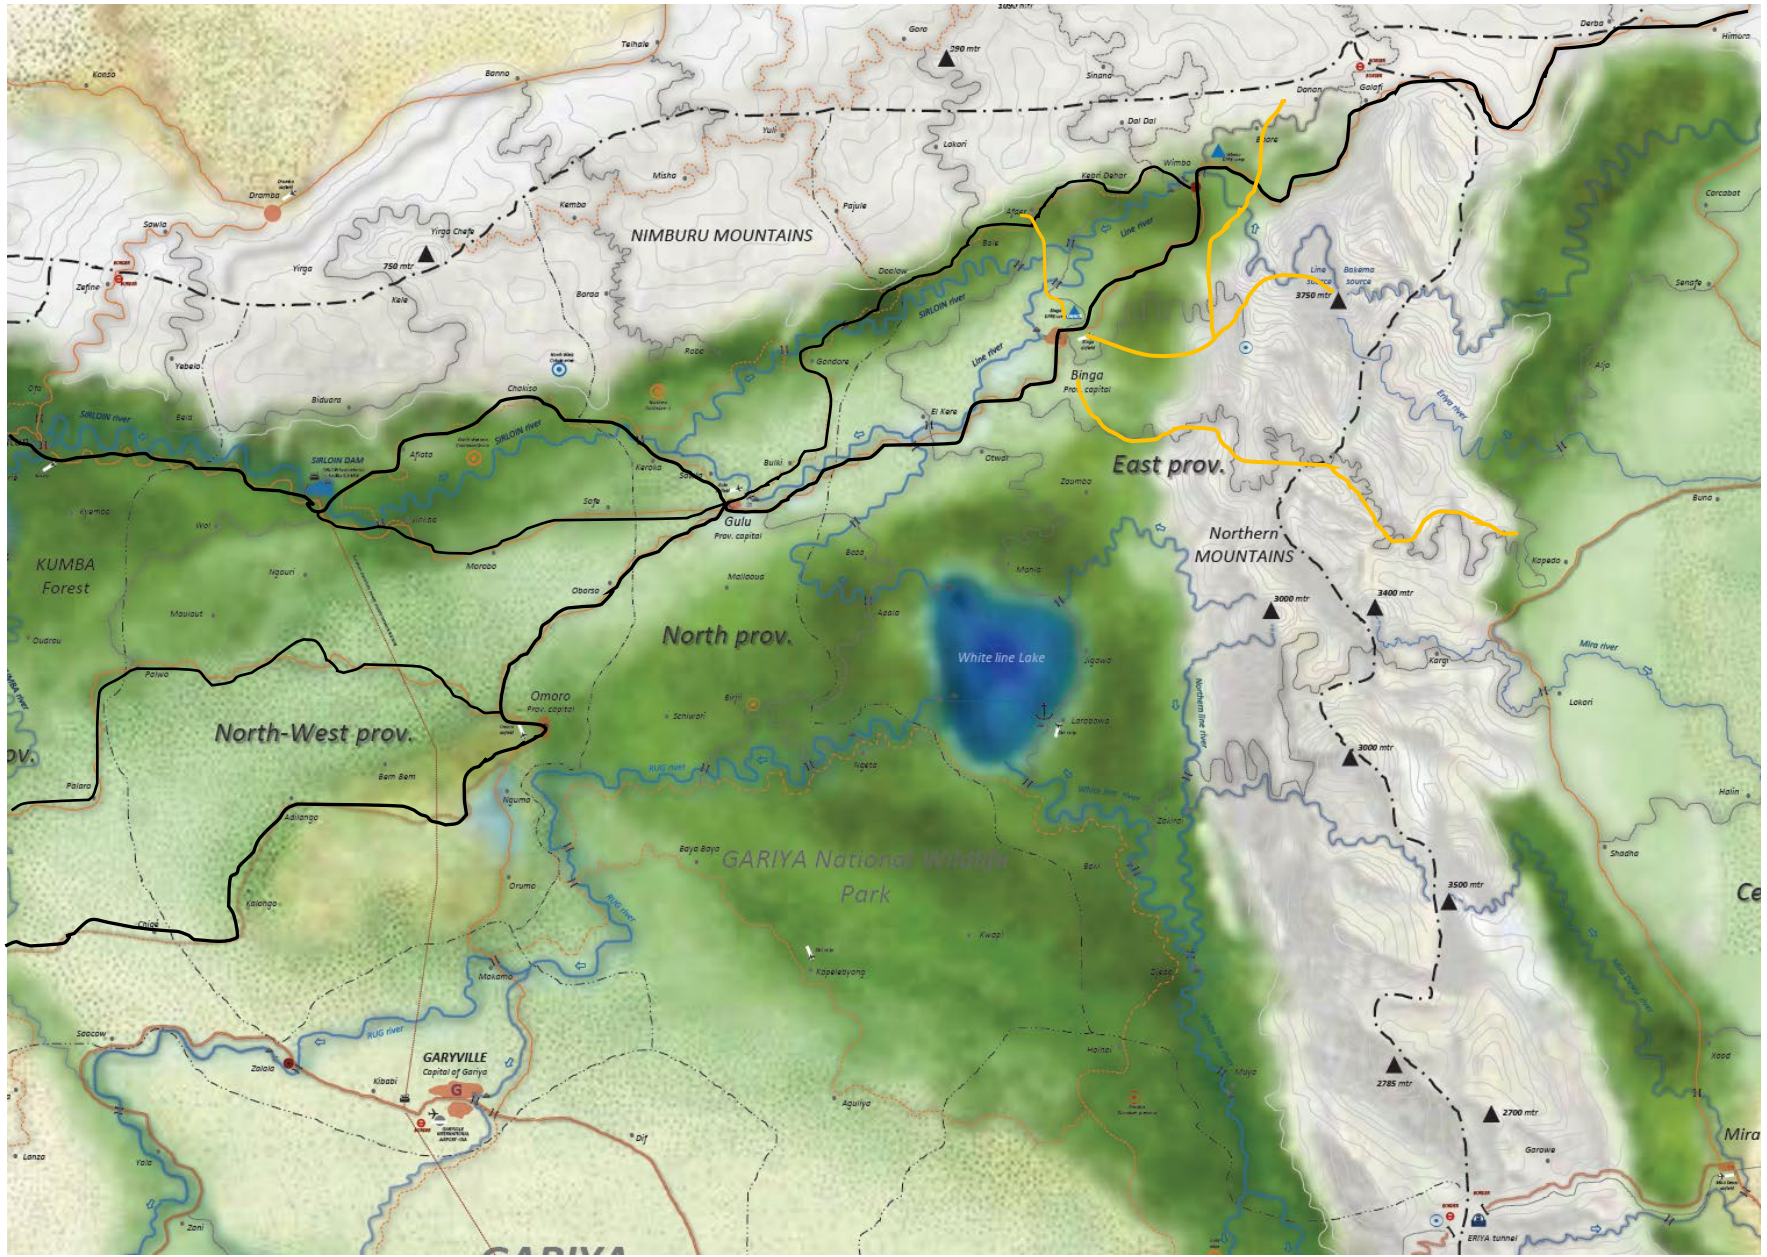

# Restricted Terrain

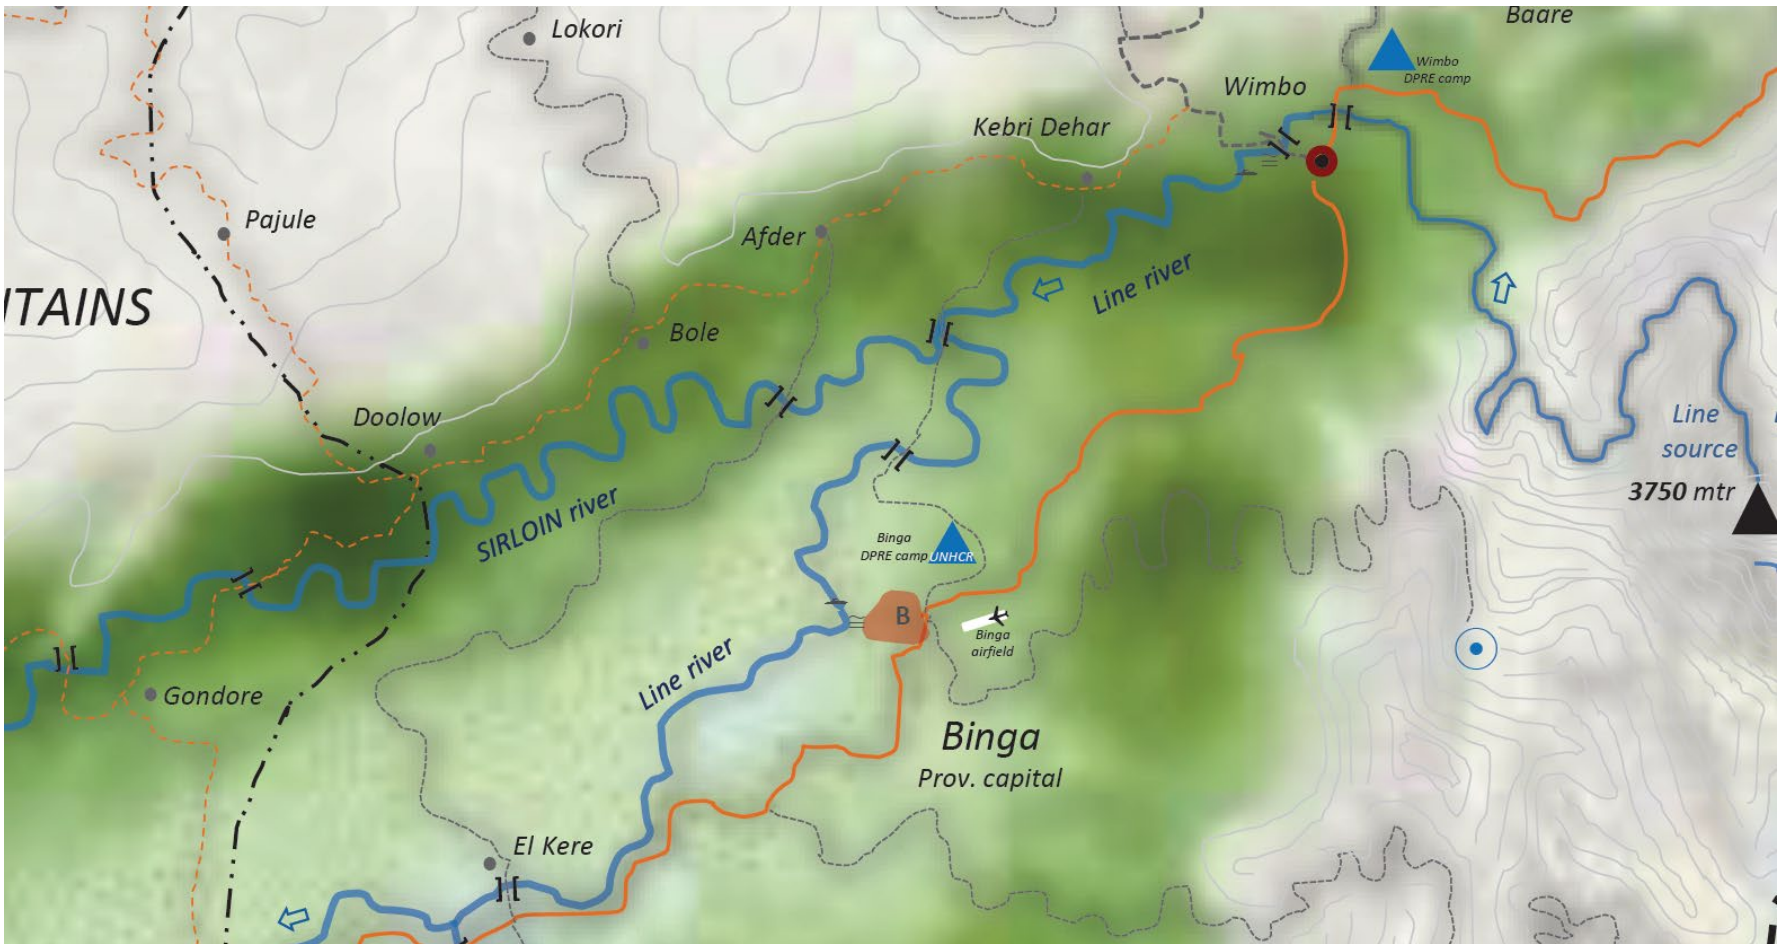

# Ground in general – Known Routes / Avenues of Approach

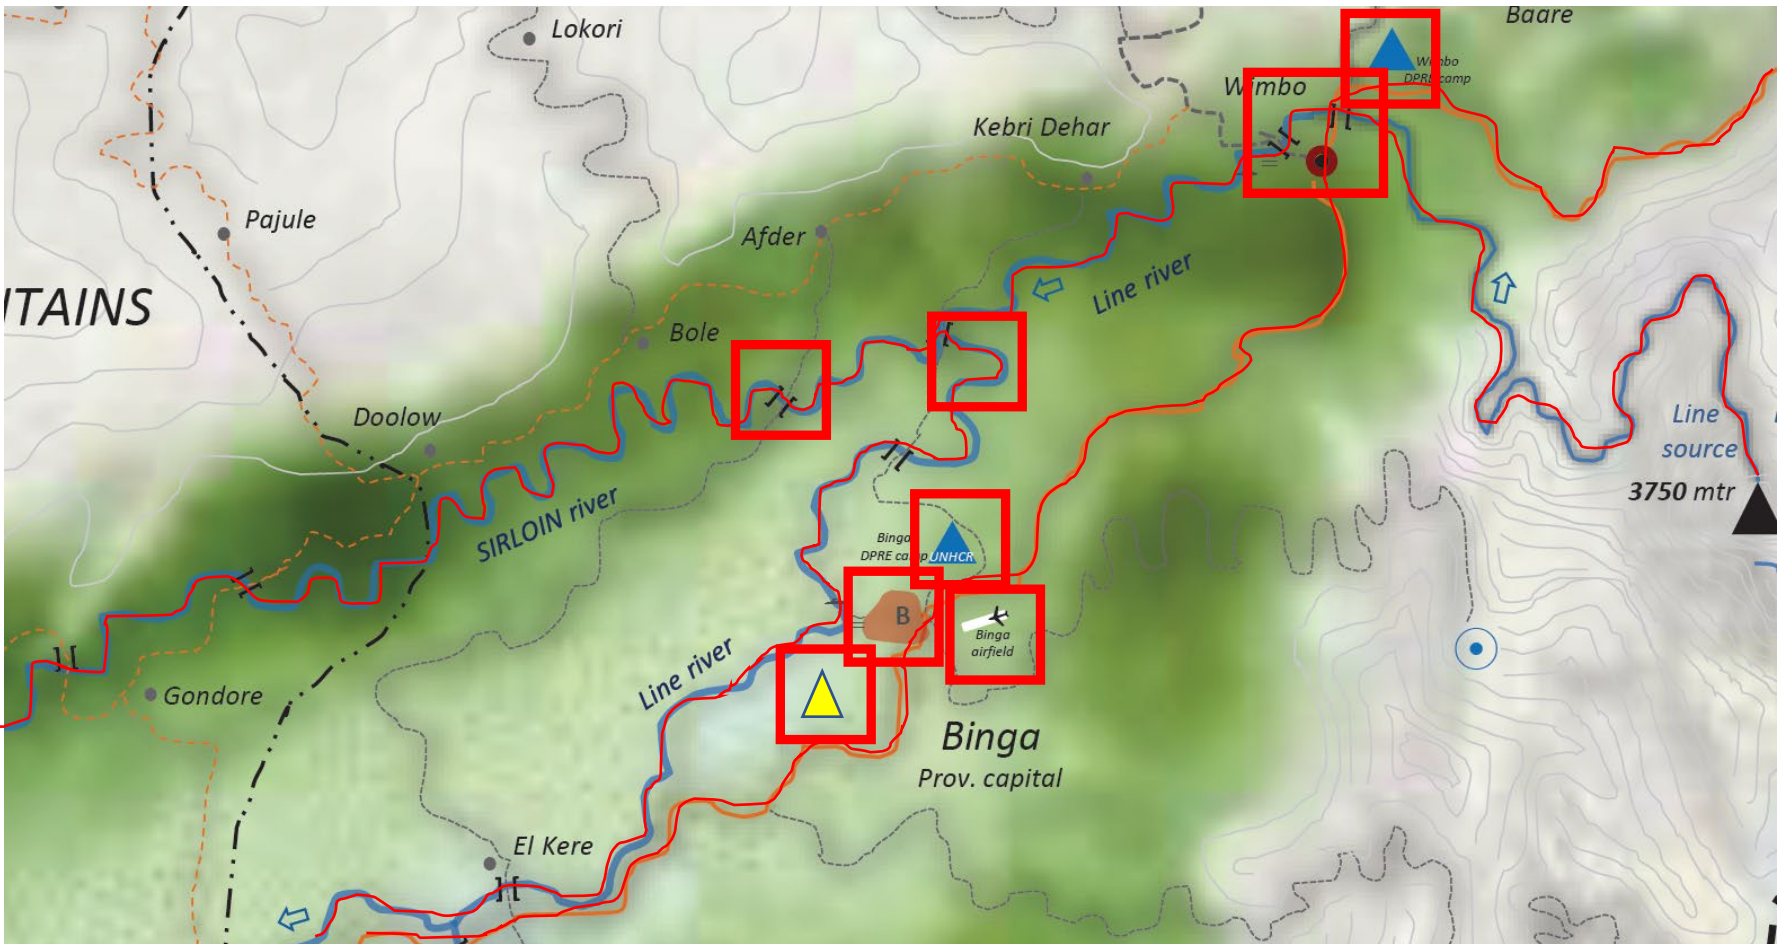

# Ground in detail – Mission specific

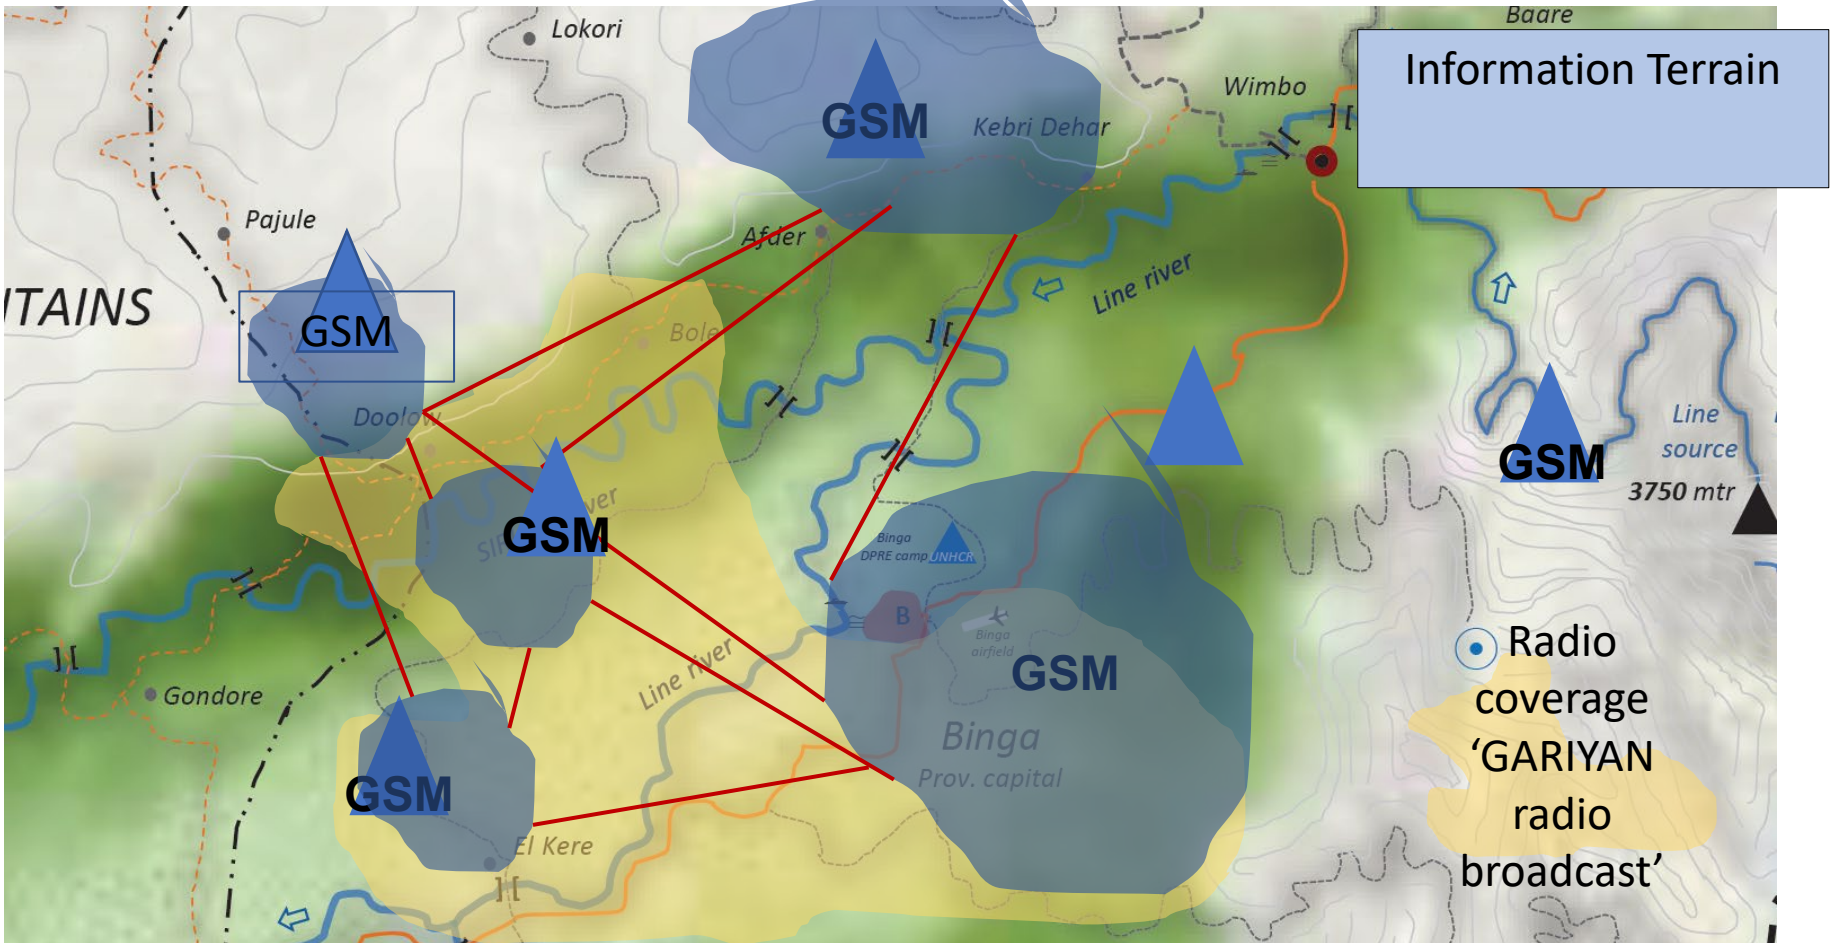

# Ground in detail – Mission specific

# Information Terrain

# Information Terrain – Mission specific

**How do population communicate?**

**How robust is this network?**

**How secure is it?**

**How does it affect our mission?**

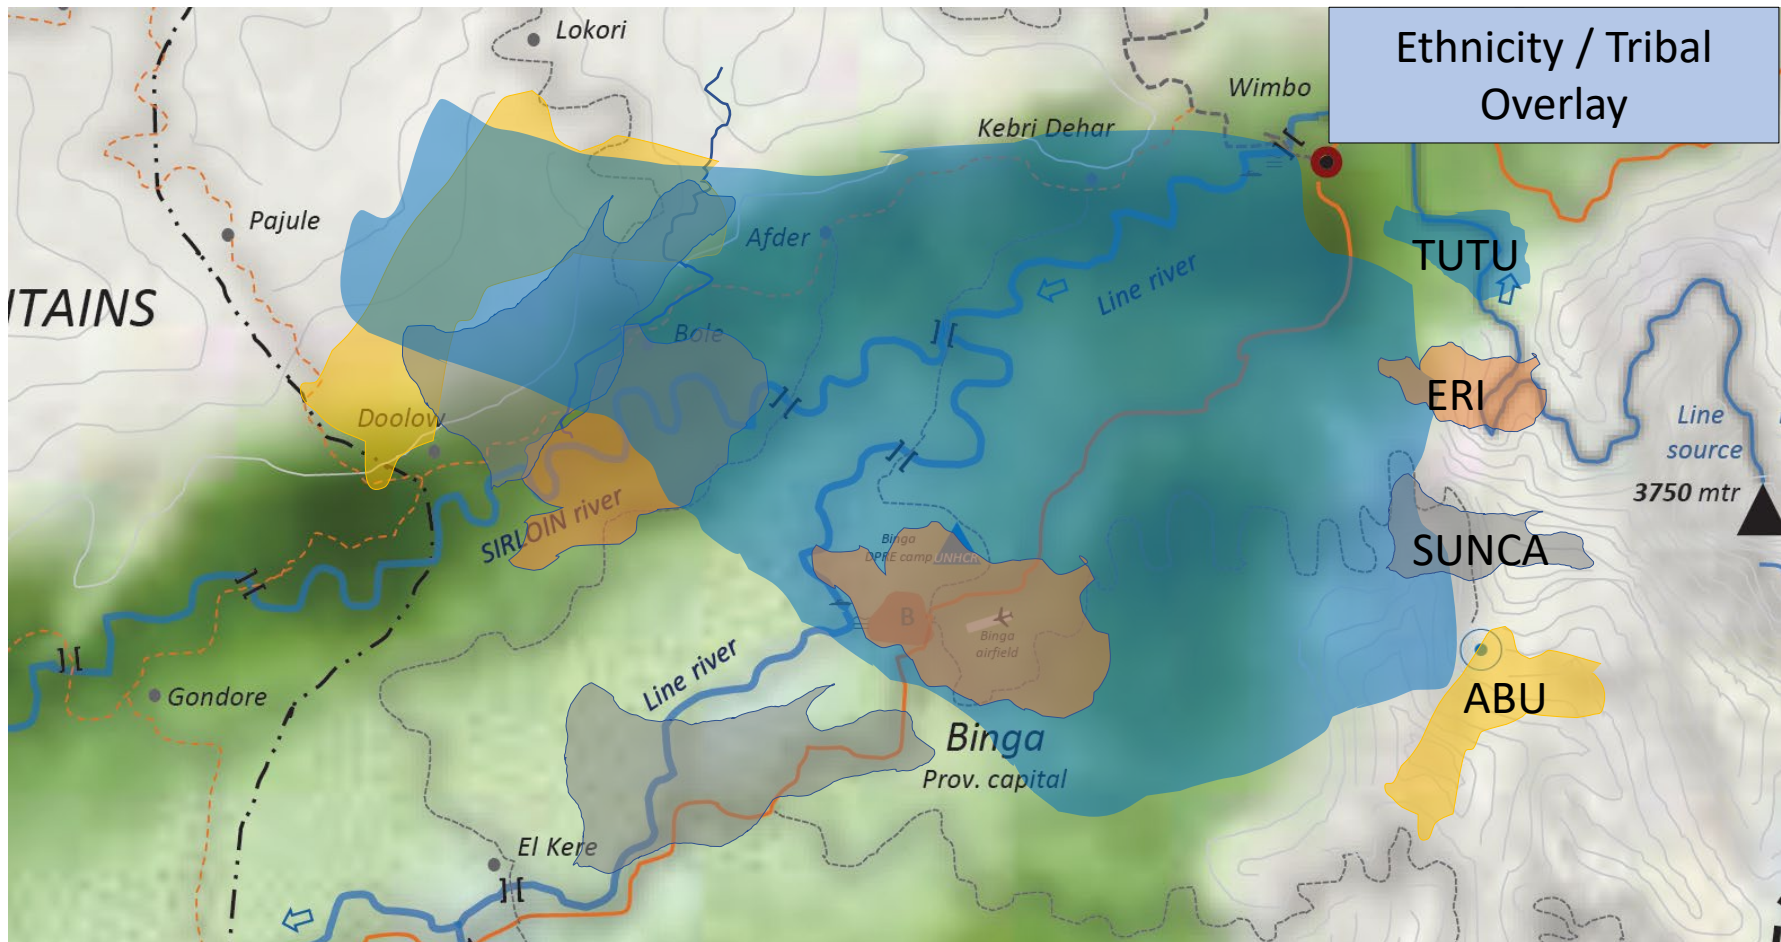

# Human Terrain

# Human Terrain – Mission specific

# Human Terrain – Mission specific

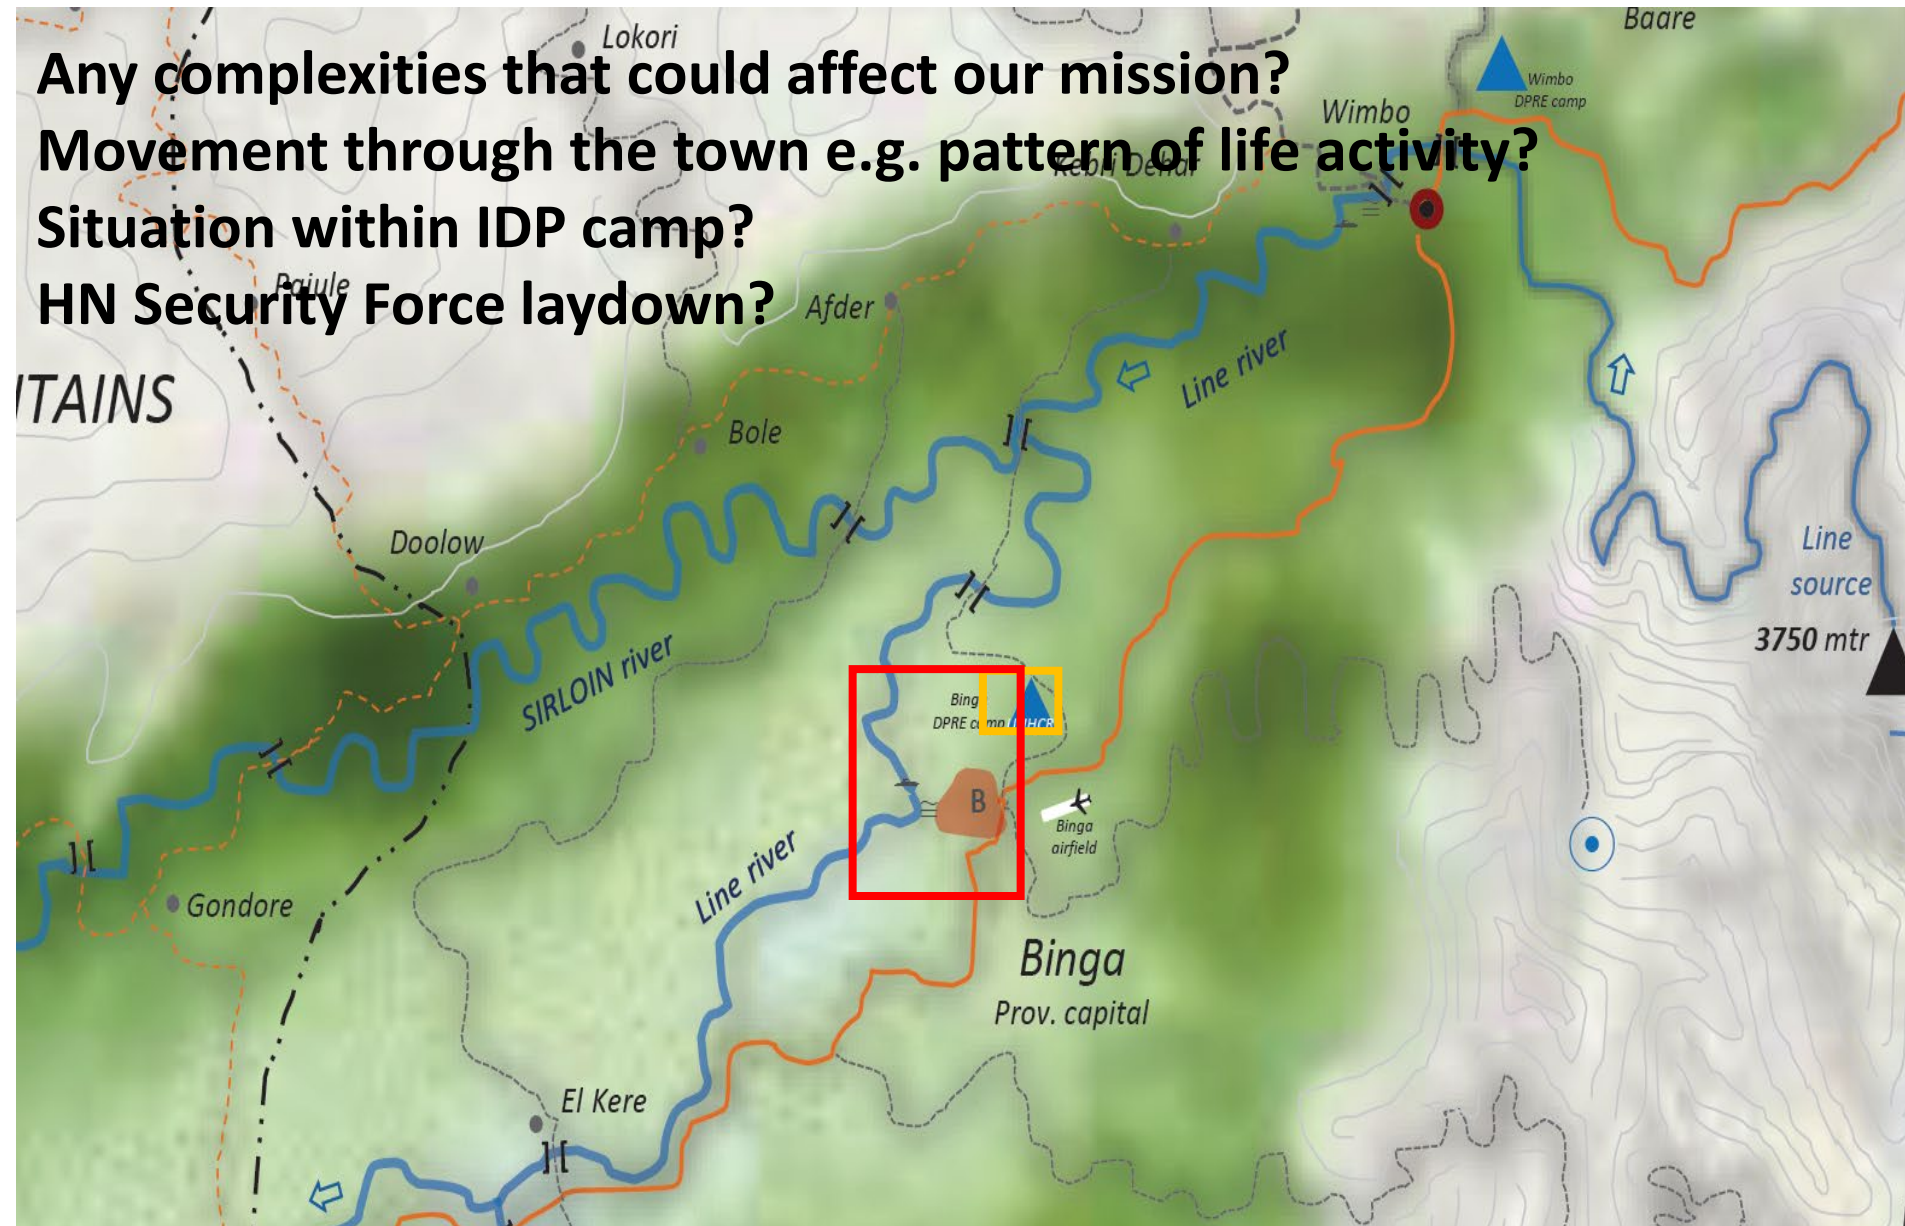

**Where could the actor get its support?**  
**Which areas are permissive to UN?**

# Human Terrain – Mission specific

**Any complexities that could affect our mission?**  
**Movement through the town e.g. pattern of life activity?**  
**Situation within IDP camp?**  
**HN Security Force laydown?**

How does it affect the mission?

What pertinent detail is included here?

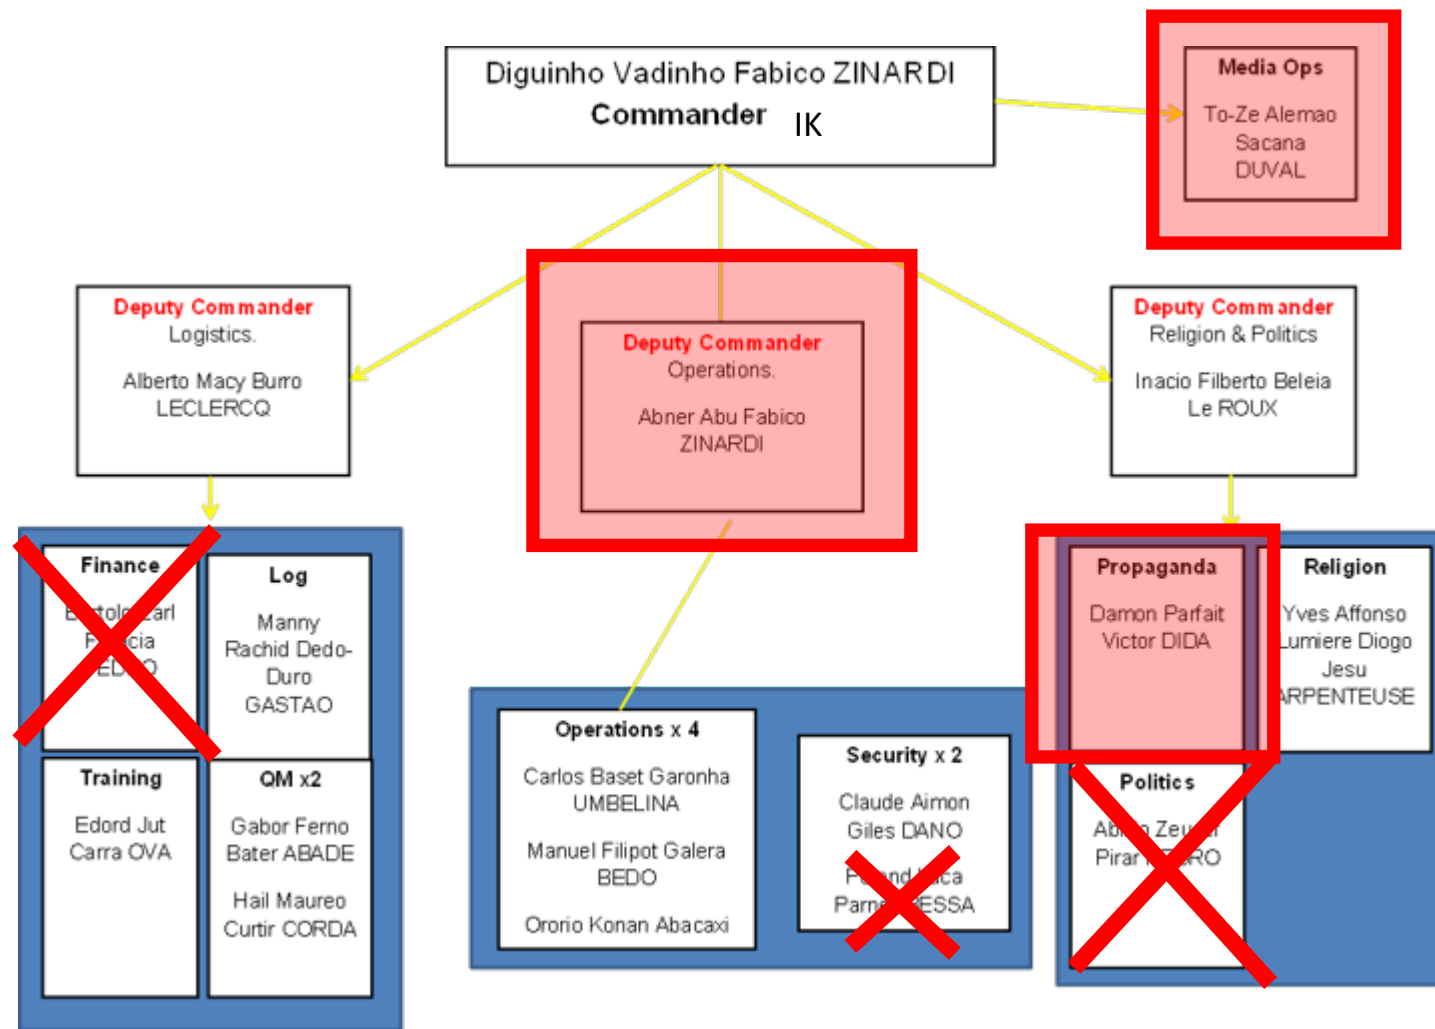

# Actor Evaluation – Mission specific

- **Known locations? Are they assessed locations?**
- **Known numbers?**
- **How old is the data that forms the basis of that assessment?**

# Actor Evaluation – IK

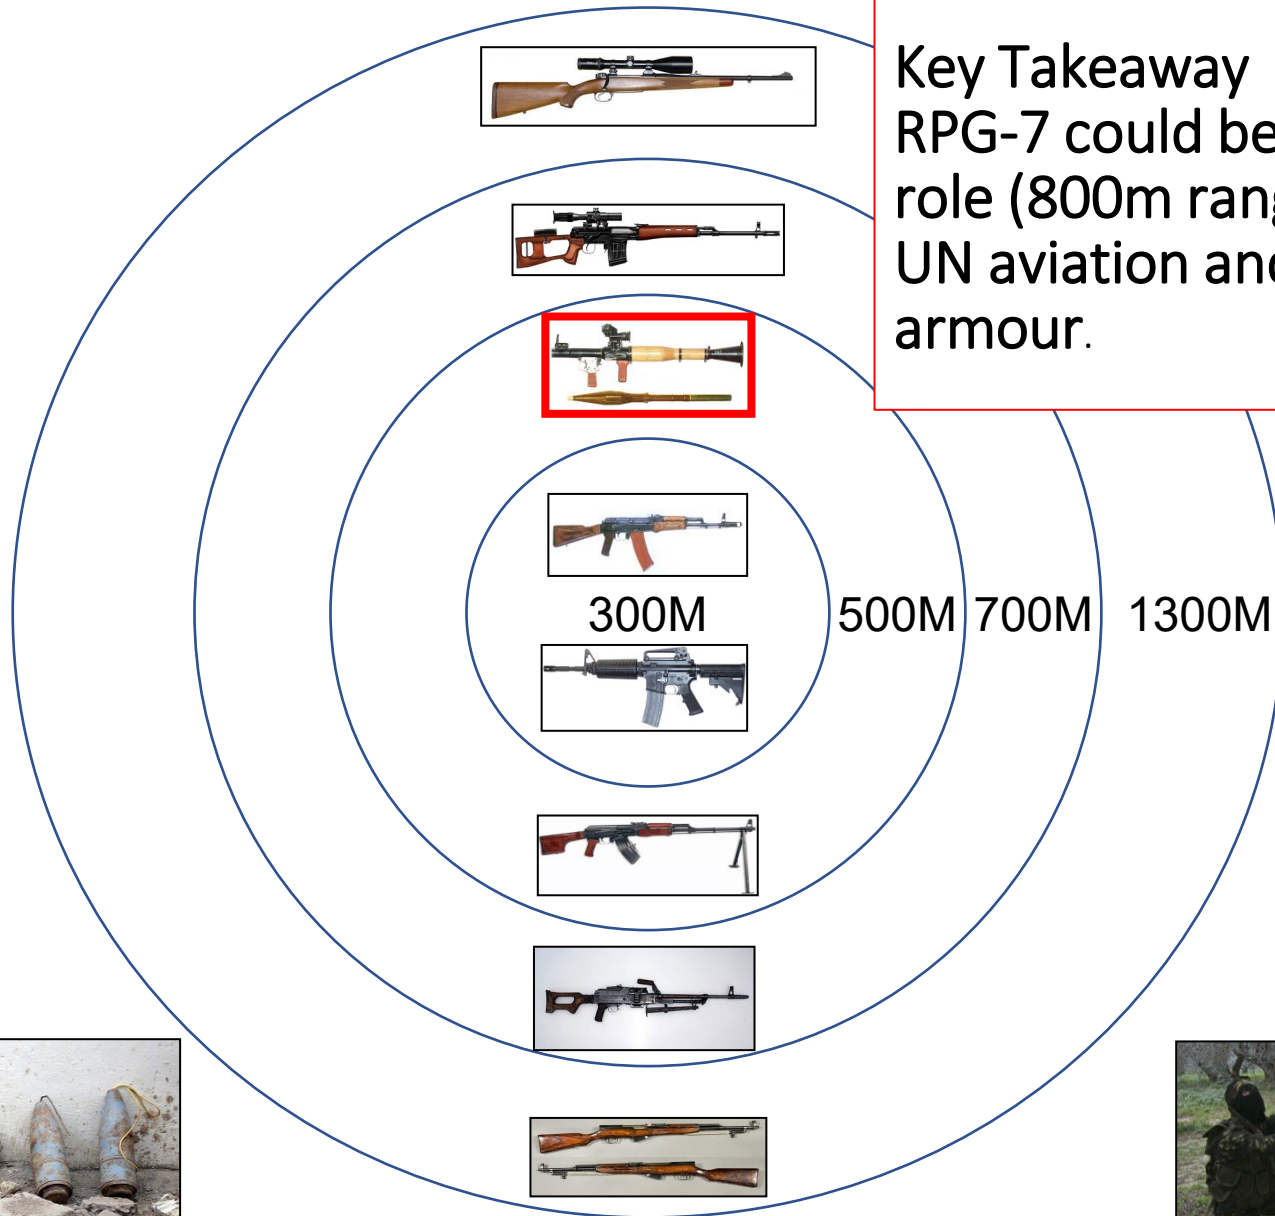

- What is the important data? Who is important and why?
- How does the leader maintain control and deliver orders?
- Has this organisation changed due to the success of UN missions?

# IK – COWARD – Key Takeaways

Capability	Organisation	Weapons + Equipment	Asymmetric TTPs	Reinforcement / Logistics	Dispositions / Doctrine
Little is known about its key leaders, but the 'Nimr' (NFDK) is known to be the overall military leader.	Katibats – operating in respective clan areas	Small Arms – AK variants. Sophisticated Sniper capability SIEDs	Hit and run ambush attacks against host nation security forces	Each Katibat has a religious and military leader.	Standard insurgent / guerrilla TTPs.
religious leaders to deliver propagandistic sermons targeting its enemies  Limited campaign given size of grouping  No evidence of capability to conduct a spectacular	IK has a decentralized leadership model, with key leaders – of which little is known - based in Abusir;  Katibats don't operate as a single entity – each comprises sub-groups.  Excellent COMSEC	use females in SPBIEDs  SVBIEDs	IK not capable of large-scale conventional operations against UNMIGAR or the GAF.  IK asymmetric attack capabilities have increased as a result of the recent influx of combat-hardened Jihadist fighters from the 6 <sup>th</sup>	Support from population who believe in their ideology.  the group utilizes caches of weapons, hidden on both sides of the border, enabling personnel to evade detection at GAF checkpoints	Unlikely to surrender

**Key Takeaway**  
RPG-7 could be used in SA role (800m range). Threat to UN aviation and light-armour.

# IK – SWOT – Mission specific

## Strengths

- **COMSEC**
- Local knowledge
- **Decentralized Leadership**
- Reputation and propaganda

## Opportunities

- Weak Host Nation Security Forces
- Expanding Links with the AWF
- Lack of formal economic opportunities
- Structural causes of the conflict

## Weakness

- Requirement for religious justification
- Physical Terrain
- Local support not guaranteed
- Composition
- **Capability**

## Threats

- Deployment of UNIGAR
- Coalition between regional partners
- **International CT operations**

**Centre of Gravity: Support of the population**

# Situation Integration

**Intent/Purpose.**

DISRUPT UN activity without becoming decisively engaged. UNDERMINE UN presence within the Sector.

**MSN.** Conduct small arms ATTACK on UN bases IOT REINFORCE their IO campaign.

**Endstate.** UN being forced to increase security at its bases makes UN a static force, unable to deploy to more than a handful of urban areas. IK increases its control to more areas of Sector west.

**Scheme of Manoeuvre:**

**Shaping:**

- Hate speeches. UN as the target.
- Small teams will forward mount to urban areas to prepare.
- Surveillance of UN base and UN force movements.

**Decisive:**

- Once recce screen is in place, the attack teams will move forward to conduct attack.
- Use of VHF radios to control the attacks. Assessed firing point will be from southern edge of urban area.
- Attack will last NMT 5-10 minutes as per previous attacks. Wpns will be dropped or taken to local caches.

**Sustaining:**

- Teams will withdraw before decisively engaged using terrain to cover movement.
- Increased messaging and propaganda will follow shortly after attack claiming responsibility undermine UN credibility.

**I & W:**

- Increase in anti-UN propaganda.
- Increased surveillance of UN TOBs;
- Testing of UN security procedures involving unarmed personnel by day and night;
- Significant change to pattern of life in and around UN bases;

**IHI:**

- Weapons caches;
- Sniper rifles

**Weaknesses**

- VHF radios can be intercepted.

**Strengths**

- Ability to blend in with population.
- Cover provided to East iot support withdrawal.

**Tactical Functions:**

1. C2 – decentralised command structure. Use of VHF.
2. Info & Int – Population support base
3. Firepower – Sniper rifles (U/K variant) and AK47 variants.
4. Manoeuvre – Urban – use of motorbikes, light role.
5. Protection – OPSEC and COMSEC
6. Sustainment – Use of population and hides to secure lethal aid.

### Intent/Purpose.

NEUTRALISE UN forces in the Sector to undermine UN presence in GARLAND.

**MSN.** Conduct a complex ATTACK on UN base IOT SECURE FOM and undermine UN forces.

**Endstate.** UN being forced to withdraw from sector. UN ability to provide security undermined. IK secures total control of sector.

### Scheme of Manoeuvre:

#### Shaping:

- Coercion of vulnerable IDPs.
- Facilitation of SIED and influx of IED expertise into the AO.
- Staging into urban area prior to conduct of attack.

#### Decisive:

- Use of SIEDs to breach UN TOB perimeter. Followed by ground attack in force.
- Use of VHF radios to control the attacks and as back-up should SIED not be victim operated.

#### Sustaining:

- Securing of TOB before withdrawal in order to maintain critical capability.
- Increased messaging and propaganda will follow shortly after attack claiming responsibility undermine UN credibility.
- Replenishment of IED components.

### I & W:

- Increased coercion activity within IDP camps.
- Increase in facilitation of IED components;
- Staging of IED facilitators/SMEs into the AO.

### IHI:

- IED SMEs

### Weaknesses

- VHF radios can be intercepted.

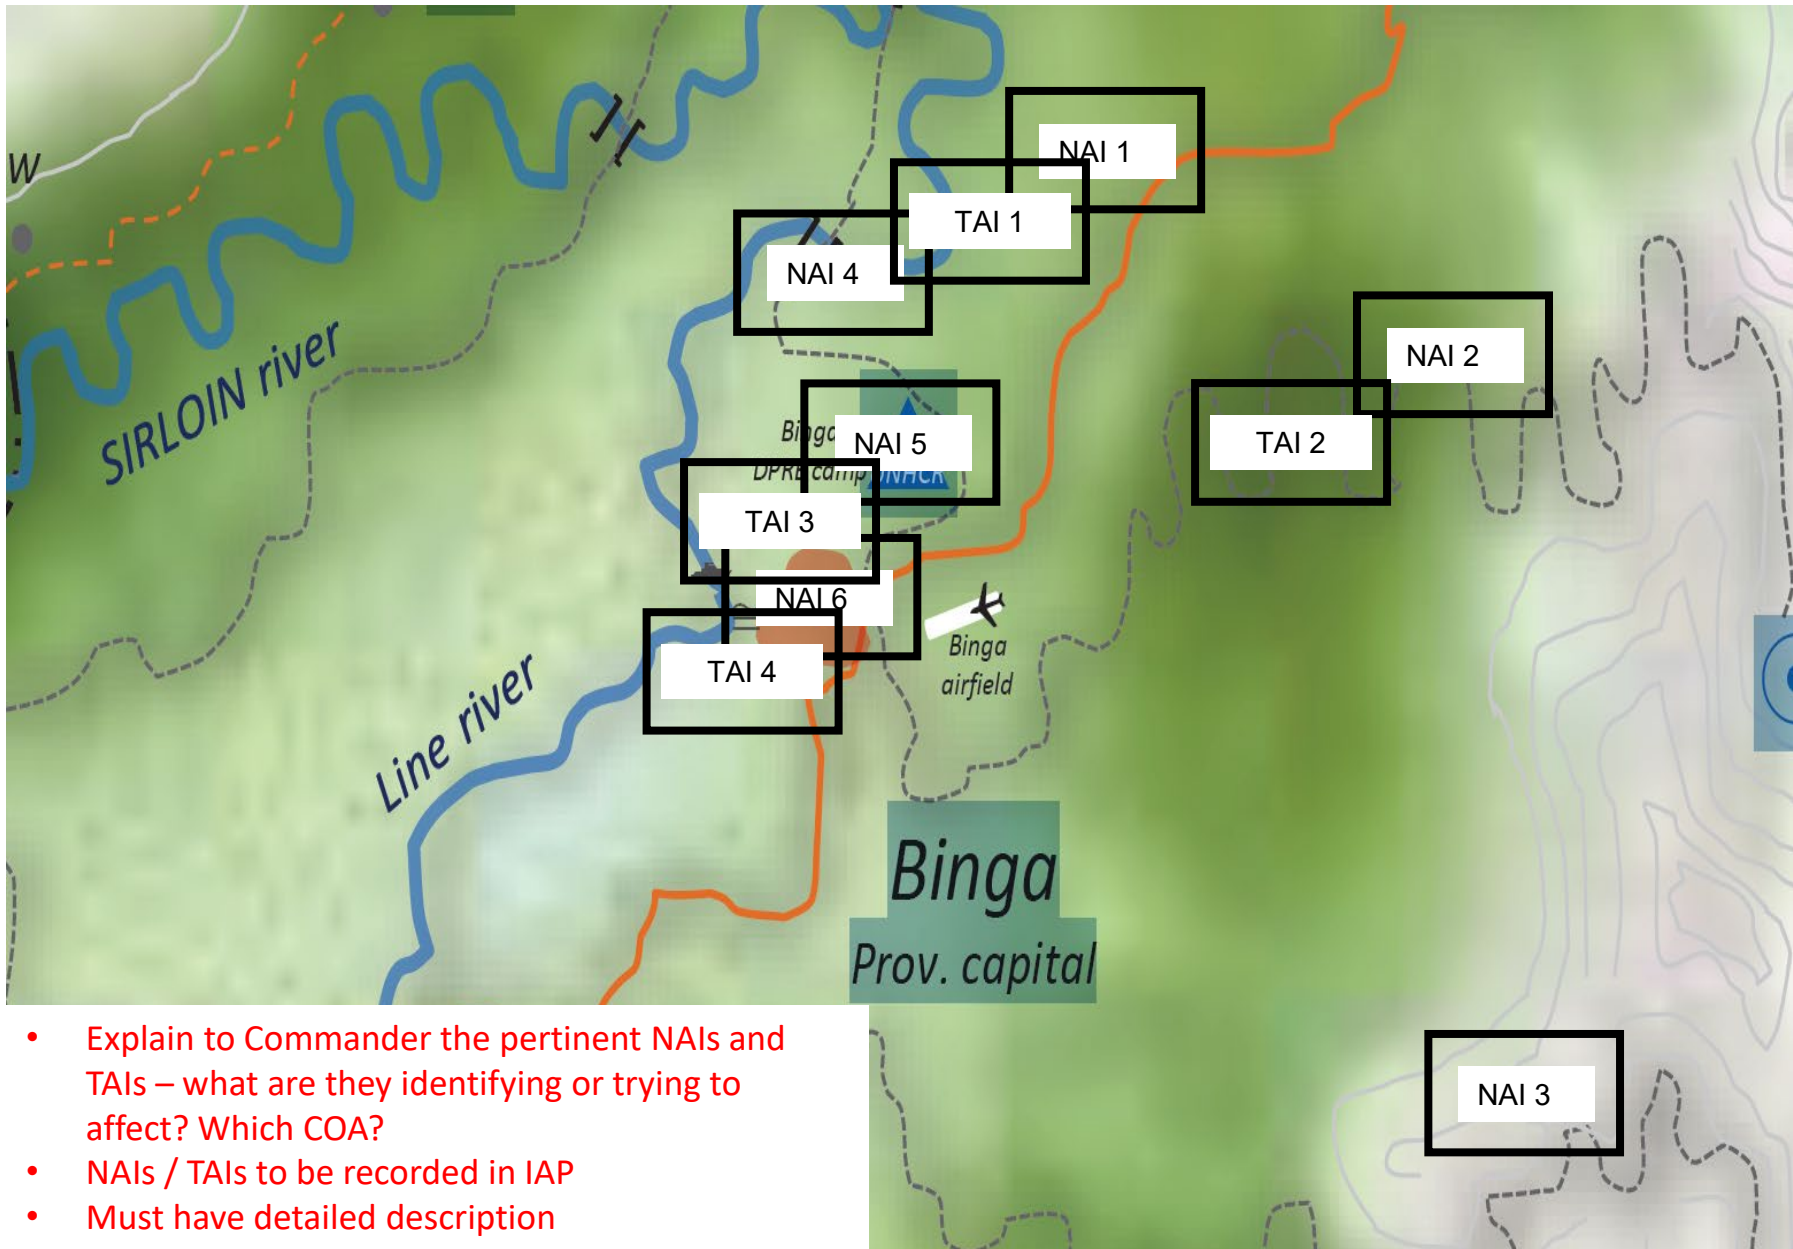

### Strengths

- Ability to blend in with population.
- Cover provided to East iot support withdrawal.

### Tactical Functions:

1. C2 – decentralised command structure. Use of VHF.
2. Info & Int – Population support base
3. Firepower – IED vests, AK47 variants.
4. Manoeuvre – On foot. Use of population and urban areas.
5. Protection – OPSEC and COMSEC
6. Sustainment – Reserves in depth.

# Event Overlay – Decision Support

# Priority Intelligence Requirements

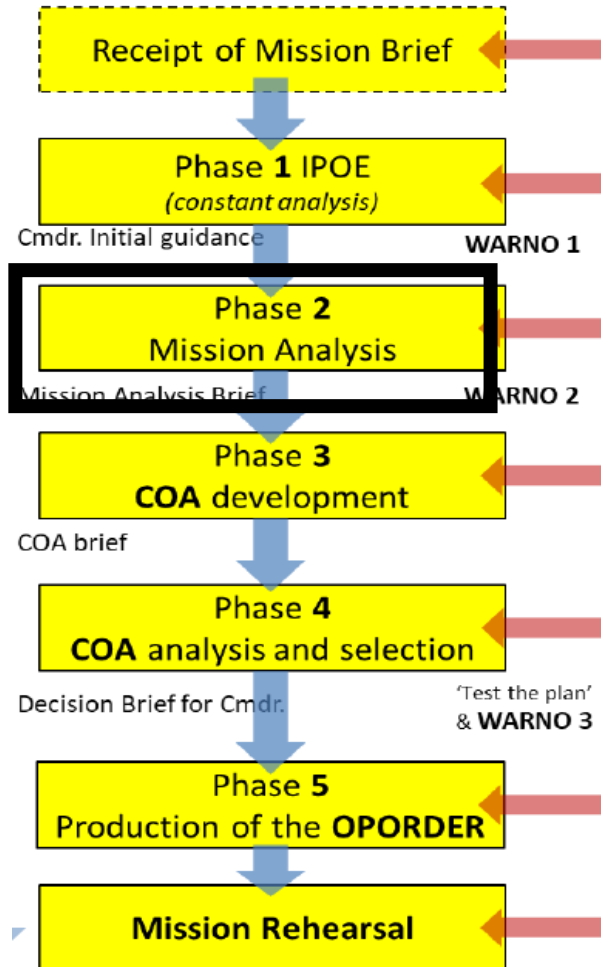

- Where are the IK bed down locations within urban areas?
- What support do they have from the local population / delegation / security forces?
- What vulnerabilities does IK's C2 have to intercept?
- Critical Intelligence Gap
- What is the level of IK influence within the IDP camp?
- What is IK's IED capability?

# Verbal Briefs – Tips

- Remove distractions
- Follow formats, avoid scripts
- Determine time to brief- stick to it
- Identify and arrange aids
- Pertinent information only
- Briefer- experience more important than rank
- Eye contact
- Rehearse – this is vital

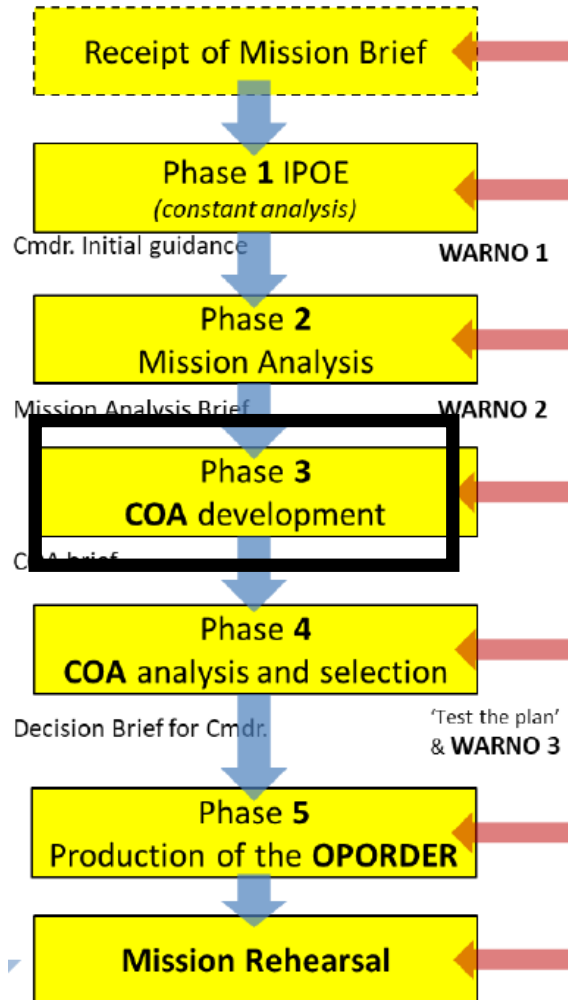

# Mission Analysis

- MPKI contribution to mission analysis
- PIR confirmation
- Warning Order 2 – Situation paragraph – if change / update from Warning Order 1.

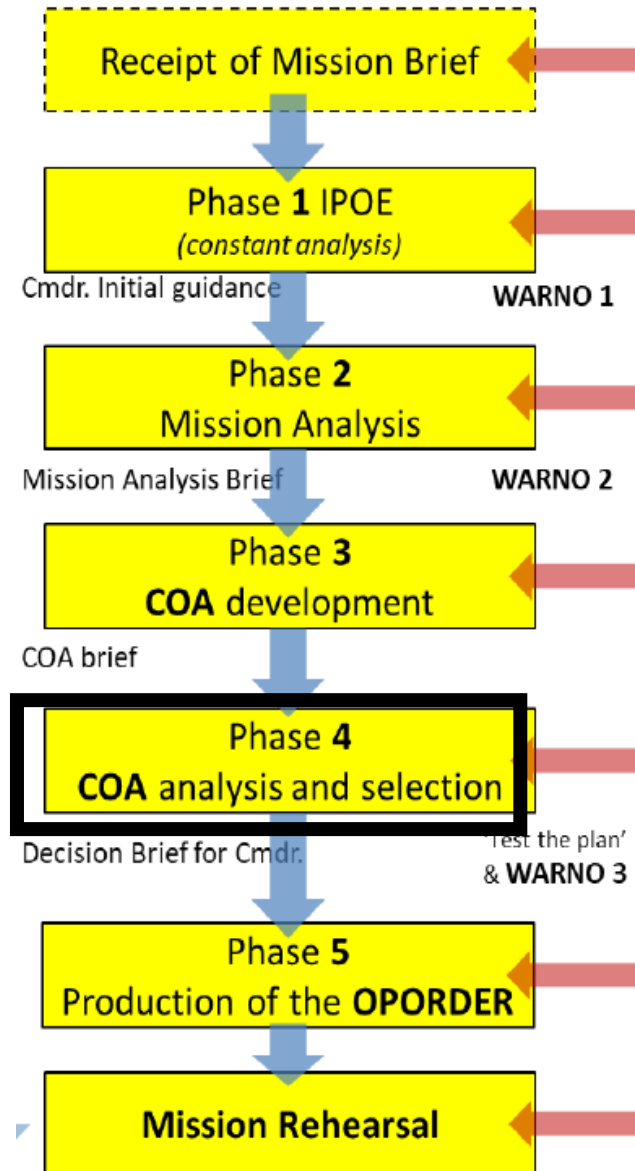

# COA Development

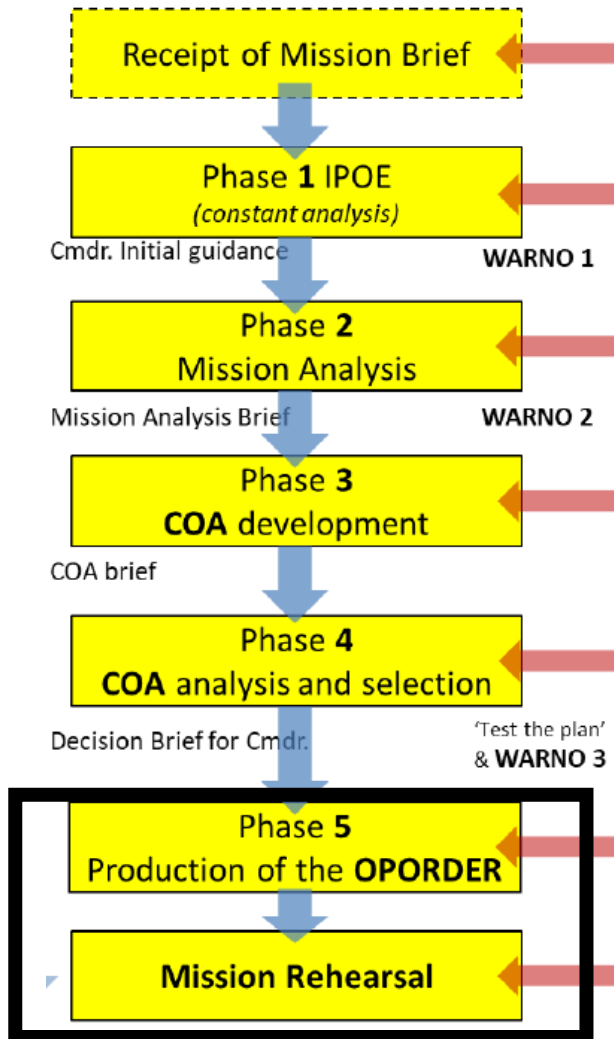

- MPKI supports planning team
- Confirm Actor's COAs
  - Most Likely
  - Most Dangerous
- Update IAP and OE situation
- Supports own forces COA brief
- Inputs from Phase One Brief / continuous AOE

# COA Analysis and Selection

- Supports COA analysis and selection (relevant threat/actors)
- Consider MPKI actions required during mission execution
- Provide MPKI contingencies to “test” the plan
- Draft situation paragraph for WARNO 3

# Production of the OPORD

- MPKI guidance on control measures
- De-confliction of acquisition and operational activities
- Draft situation paragraph, peacekeeping-intelligence annex
- Supports staff branch annexes
- Supports Mission Rehearsal – raise scenarios and contingencies (Red-teaming / war-gaming)

# Takeaway

- PKI support for the MDMP provides inputs to be integrated during all phases of the planning process
- The Phase One brief is the MPKI cell's moment to situate and inform the Command and Staff prior to the conduct of planning
- An updated peacekeeping-intelligence picture and 'testing' of the potential COAs will inform planning and shape the COA Brief
- The role of the MPKI staff during mission rehearsal is to raise realistic and relevant scenarios involving the physical, information and human terrains to test the plan and ensure that it is viable in relation to possible contingencies

Questions?
